Item 8.01. Other Events.

On March 28, 2023, Neurocrine Biosciences, Inc. (the “Company”) entered into an agreement with Teva Pharmaceuticals, Inc., and Teva Pharmaceuticals USA, Inc. (collectively, “Teva”) resolving patent litigation related to INGREZZA[®], the Company’s medication for the treatment of tardive dyskinesia. The pending patent litigation was filed by the Company in the United States District Court for the District of Delaware in response to Teva notifying the Company that it had submitted an Abbreviated New Drug Application (ANDA) to the United States Food and Drug Administration seeking approval to market generic versions of INGREZZA prior to expiration of the Company’s Orange Book listed patents. As a result of this settlement agreement, the Company has granted Teva the right to sell generic versions of INGREZZA in the United States beginning February 1, 2040 or earlier under certain circumstances. As required by law, the Company and Teva will submit the agreement to the United States Federal Trade Commission and the United States Department of Justice. Similar patent litigation brought by the Company against three other companies that filed ANDAs seeking approval to market generic INGREZZA remains pending with a trial date set for January 2, 2024.
