NEUROCRINE BIOSCIENCES, INC.  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)

NOTE 1. BASIS OF PRESENTATION

The condensed consolidated financial statements included herein are unaudited. These financial statements include the accounts of Neurocrine Biosciences, Inc. (the "Company") and its wholly owned subsidiary, Northwest NeuroLogic, Inc. ("NNL"). All significant intercompany transactions have been eliminated in consolidation. The Company's minority ownership interest in Neuroscience Pharma, Inc. ("NPI") has been accounted for under the equity method. Certain reclassifications have been made to prior year amounts to conform to the presentation for the three and nine months ended September 30, 1998.

The condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions of the Securities and Exchange Commission on Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, these financial statements include all adjustments (consisting of normal recurring adjustments) necessary for a fair presentation of the financial position, results of operations, and cash flows for the periods presented.

The results of operations for the interim periods shown in this report are not necessarily indicative of results expected for the full year. The financial statements should be read in conjunction with the audited financial statements and notes for the year ended December 31, 1997, included in the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission.

NOTE 2. NET INCOME PER SHARE

In accordance with Financial Accounting Standards Board Statement No. 128, "Earnings per Share" ("SFAS 128"), basic earnings per share is calculated by dividing net income by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution of securities that could share in the earnings of the Company such as common stock which may be issuable upon exercise of outstanding common stock options, warrants and preferred stock. These shares are excluded when their effects are antidilutive. As required by SFAS 128, the Company has restated the earnings per share presentations for the periods ended September 30, 1997.

NOTE 3. COMPREHENSIVE INCOME

On January 1, 1998, the Company adopted Statement of Financial Accounting Standard No. 130, "Comprehensive Income" ("SFAS 130. SFAS 130 requires the disclosure of all components of comprehensive income, including net income and changes in equity during a period from transactions and other events and circumstances generated from non-owner sources. Other comprehensive income consisted of gains (losses) on short-term investments of \$16,000 and \$21,000 for the three and nine months ended September 30, 1998, respectively, and \$230,000 and \$150,000 for the respective periods in 1997.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis of Financial Condition and Results of Operations of Neurocrine Biosciences, Inc. ("Neurocrine" or the "Company") contains forward-looking statements which involve risks and uncertainties, pertaining generally to the expected continuation of the Company's collaborative agreements, the receipt of research payments thereunder, the future achievement of various milestones in product development and the receipt of payments related thereto, the potential receipt of royalty payments, pre-clinical testing and clinical trials of potential products, the period of time the Company's existing capital resources will meet its funding requirements, and financial results and operations. Actual results could differ materially from those anticipated in these forward-looking statements as a result of various factors, including those set forth below and those outlined in the Company's 1997 Annual Report on Form 10-K filed with the Securities and Exchange Commission.

OVERVIEW

Since the founding of the Company in January 1992, Neurocrine has been engaged in the discovery and development of novel pharmaceutical products for diseases and disorders of the central nervous and immune systems. To date,

Neurocrine has not generated any revenues from the sale of products, and does not expect to generate any product revenues in the foreseeable future. Revenues are expected to come from the Company's strategic alliances. The Company expects to generate future net losses in anticipation of significant increases in operating expenses as products are advanced through the various stages of clinical development. As of September 30, 1998, Neurocrine has incurred a cumulative deficit of approximately \$18.1 million and expects to incur operating losses in the future, which may be potentially greater than losses in prior years.

## RESULTS OF OPERATIONS

### THREE MONTHS ENDED SEPTEMBER 30, 1998 AND 1997

Revenues for the third quarter of 1998 were \$5.1 million compared to \$6.2 million for the comparable period in 1997. The decline of \$1.1 million in revenues resulted primarily from non-recurring 1997 revenues including \$1.1 million in sponsored research payments received under the Janssen collaboration and \$1.0 million in milestone payments received under the Novartis collaboration. Other revenues in 1998 included sponsored development reimbursements of \$2.1 million from NPI.

Research and development expenses increased to \$8.7 million for the third quarter of 1998 compared to \$5.0 million for the same period in 1997. This increase reflects higher costs associated with increased scientific personnel and related expenditures as the Company broadens its clinical development pipeline.

General and administrative expenses increased to \$1.8 million during third quarter of 1998 compared to \$1.6 million for the same period in 1997. The increase resulted primarily from additional administrative personnel, business development and professional service expenses to support the expanded clinical development efforts.

Interest income increased to \$1.2 million during the third quarter of 1998 compared to \$1.1 million for the same period last year. This increase was due to higher effective interest yields on the Company's investment portfolio during the third quarter of 1998 compared to the same period last year.

Net loss for the third quarter of 1998 was \$4.0 million or \$0.22 per share compared to net income of \$813,000 or \$0.05 per share (\$0.04 per share assuming dilution) for the same period in 1997. The decrease in net earnings and earnings per share resulted primarily from an increase in 1998 research and development expenses of \$3.7 million related to the Company's efforts to broaden its clinical development pipeline and \$1.1 million of non-recurring sponsored research and milestone revenues received in 1997.

To date, the Company's revenues have come from funded research and achievements of milestones under corporate collaborations. The nature and amount of these revenues from period to period may lead to substantial fluctuations in the results of quarterly revenues and earnings. Accordingly, results and earnings of one period are not predictive of future periods.

### NINE MONTHS ENDED SEPTEMBER 30, 1998 AND 1997

Revenues for the nine months ended September 30, 1998 were \$11.5 million compared to \$19.9 million for the comparable period in 1997. The decline in revenues of \$8.4 million resulted primarily from non-recurring 1997 revenues including \$2.6 million in sponsored research payments received under the Janssen collaboration, \$1.0 million in milestone payments received under the Novartis collaboration and a \$5.0 million research support payment received under the Eli Lilly collaboration. Revenues in 1998 include a \$250,000 milestone payment received under the Janssen collaboration and \$2.1 million of sponsored development reimbursements from NPI.

Research and development expenses increased to \$18.6 million for the nine months ended September 30, 1998 compared with \$14.0 million for the same period in 1997. This increase reflects higher costs associated with increased scientific personnel and related expenditures as the Company broadens its clinical development pipeline.

General and administrative expenses increased to \$4.7 million during the nine months ended September 30, 1998 compared to \$4.1 million for the same period in 1997. The increase resulted primarily from additional administrative personnel, business development and professional service expenses to support the expanded clinical development efforts.

Special charges for the nine months ended September 30, 1998 of \$5.5 million consisted of \$4.2 million related to the acquisition of Northwest Neurologic, Inc. ("NNL") and \$1.3 million related to the in-licensing of two chemical compounds for insomnia and glioblastoma and non-cash charges associated with the

Company's minority-owned Canadian affiliate.

Interest income increased to \$3.3 million during the nine months ended September 30, 1998 compared to \$2.9 million for the same period last year. This increase primarily resulted from higher effective interest yields on the Company's investment portfolio during 1998.

Net loss for the nine months ended September 30, 1998 was \$13.2 million or \$0.74 per share (\$0.43 per share excluding special charges) compared to net income of \$5.1 million or \$0.30 per share (\$0.26 per share assuming dilution) for the same period in 1997. The decline in net earnings and earnings per share resulted primarily from special charges of \$5.5 million (of which \$4.9 million were non-cash charges), increased operating expenses of \$5.2 million related to the Company's broadened clinical development pipeline, and \$8.4 million of non-recurring 1997 revenues.

To date, the Company's revenues have come from funded research and achievements of milestones under corporate collaborations. The nature and amount of these revenues from period to period may lead to substantial fluctuations in the results of year-to-date revenues and earnings. Accordingly, results and earnings of one period are not predictive of future periods.

#### LIQUIDITY AND CAPITAL RESOURCES

At September 30, 1998, the Company's cash, cash equivalents, and short-term investments totaled \$66.1 million. Cash held by the Company excludes approximately \$2.9 million held by NPI, which is available to fund certain of the Company's research and development activities.

Cash used in operating activities during 1998 was \$8.0 million compared to net cash provided of \$1.5 million for the same period in 1997. The increase in cash used in operating activities during 1998 was primarily the result of decreased earnings and payment of current liabilities.

Cash provided by investing activities during 1998 was \$8.7 million compared to \$2.4 million during the same period in 1997. The increase in cash provided was primarily the result of timing differences in investment purchases and sales/maturities and fluctuations in the Company's portfolio mix between cash equivalent and short-term investment holdings.

Cash provided by financing activities during 1998 was \$2.0 million compared to net cash used of \$134,000 for the same period in 1997. The increase in net cash provided was primarily due to proceeds received from capital lease financing of \$2.3 million.

The Company believes that its existing capital resources, together with interest income and future payments due under the strategic alliances, will be sufficient to satisfy its current and projected funding requirements at least through the year 2000. However, no assurance can be given that such capital resources and payments will be sufficient to conduct its research and development programs as planned. The amount and timing of expenditures will vary depending upon a number of factors, including progress of the Company's research and development programs.

#### YEAR 2000

The "Year 2000" issue generally describes the various problems which may result from the improper processing of dates and date-sensitive calculations. Computers and other equipment containing computer-related components (such as programmable logic controllers and other embedded systems) using two digits to identify the year in a date may not be able to distinguish between dates in the 20th century versus the 21st century. This issue could cause system or equipment malfunctions resulting in material and adverse interruptions in operations.

The Company uses and relies on a variety of information technologies, computer systems and scientific equipment which could be affected by the "Year 2000" issue. In general, the Company has identified two areas for Year 2000 review: internal systems and operations, and external systems and services. The Company believes it has identified and corrected all Year 2000 issues related to its information technology ("IT") systems. The Company is currently analyzing its non-information technology ("Non-IT") systems and expects to have identified risks and planned for corrections within the next few months. Although the analysis of Non-IT systems is not complete, the Company believes that costs to correct any issues identified will be less than \$100,000.

In addition to its internal systems review, the Company plans to contact all of its significant vendors and collaborators to ascertain their Year 2000 readiness and to identify risks associated with external system failures. At that time, the Company will determine the nature and extent of contingency plans it may need to reduce risks of operational interruptions. The Company anticipates that its assessments of its significant third party relationships

will be completed by mid 1999.

Although the Company believes its key financial, information and operational systems are Year 2000 compliant, there can be no assurances that other defects will not be discovered in the future. The Company is unable to control whether the firms and vendors it does business with currently, and in the future, will have systems which are Year 2000 compliant. The Company's operations could be affected to the extent that firms and vendors would be unable to provide services or ship products. However, management does not believe the Year 2000 changes will have a material impact on its business, financial condition or results of operations.

#### CAUTION ON FORWARD-LOOKING STATEMENTS

The Company's business is subject to significant risks, including but not limited to, the risks inherent in its research and development activities, including the successful continuation of the Company's strategic collaborations, the successful completion of clinical trials, the lengthy, expensive and uncertain process of seeking regulatory approvals, uncertainties associated both with the potential infringement of patents and other intellectual property rights of third parties, and with obtaining and enforcing its own patents and patent rights, uncertainties regarding government reforms and of product pricing and reimbursement levels, technological change and competition, manufacturing uncertainties and dependence on third parties. Even if the Company's product candidates appear promising at an early stage of development, they may not reach the market for numerous reasons. Such reasons include the possibilities that the product will be ineffective or unsafe during clinical trials, will fail to receive necessary regulatory approvals, will be difficult to manufacture on a large scale, will be uneconomical to market or will be precluded from commercialization by proprietary rights of third parties.

Neurocrine will require additional funding for the continuation of its research and product development programs, for progress with preclinical testing and clinical trials, for operating expenses, for the pursuit of regulatory approvals for its product candidates, for the costs involved in filing and prosecuting patent applications and enforcing or defending patent claims, if any, the cost of product in-licensing and any possible acquisitions, and may require additional funding for establishing manufacturing and marketing capabilities in the future. The Company may seek to access the public or private equity markets whenever conditions are favorable. The Company may also seek additional funding through strategic alliances and other financing mechanisms, potentially including off balance sheet financing. There can be no assurance that adequate funding will be available on terms acceptable to the Company, if at all. If adequate funds are not available, the Company may be required to curtail significantly one or more of its research or development programs or obtain funds through arrangements with collaborative partners or others. This may require the Company to relinquish rights to certain of its technologies or product candidates.

Continued profitability is not expected as the Company's operating expenses are anticipated to rise significantly in future periods as products are advanced through the various development and clinical stages. Neurocrine expects to incur additional operating expenses over the next several years as its research, development, preclinical testing and clinical trial activities increase. To the extent that the Company is unable to obtain third party funding for such expenses, the Company expects that increased expenses will result in increased losses from operations. There can be no assurance that the Company's products under development will be successfully developed or that its products, if successfully developed, will generate revenues sufficient to enable the Company to earn a profit.

## PART II. OTHER INFORMATION

### ITEM 5. OTHER INFORMATION

#### DEADLINE FOR RECEIPT OF STOCKHOLDER PROPOSALS

Stockholders are entitled to present proposals for action at a forthcoming meeting if they comply with the requirements of the proxy rules established by the Securities and Exchange Commissions. Proposals of stockholders of the Company that are intended to be presented by such stockholders at the Company's 1999 Annual Meeting of Stockholders must be received by the Company no later than December 18, 1998 in order that they may be considered for inclusion in the proxy statement and form of proxy relating to that matter.

If a stockholder intends to submit a proposal at the Company's Annual Meeting, which is not eligible for inclusion in the proxy statement relating to that meeting, the stockholder must give the Company notice in accordance with the requirements set forth in the Securities Exchange Act of 1934, as amended,

no later than February 8, 1999. If such a stockholder fails to comply with the foregoing notice provision, the proxy holders will be allowed to use their discretionary authority when and if the proposal is raised at the Company's Annual Meeting in 1999.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K

(a) Exhibits. The following exhibits are filed as part of, or incorporated by reference into this report:

27 Financial Data Schedule

(b) Reports on Form 8-K. During the quarter ended September 30, 1998, the Company filed no current Reports on Form 8-K.

SIGNATURES

Pursuant to the requirements of the Securities and Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

NEUROCRINE BIOSCIENCES, INC.

Dated: 11/13/98
